Top 5 products of 2007

Readers select their favorites from Gutter Opportunities

Gutter contractors are always looking for something to give them an edge. Competition is fierce and any accessory can make the difference between landing a job and missing out on a bid.

Gutter Opportunities is the first place to find information on rain handling related products, everything from new machines and profiles to gutter protection and hangers. If it's about gutters, we've got it.

In every *Gutter Opportunities* section or supplement, readers learn about all sorts of products and ask for more information about them by circling the corresponding numbers on the reader service card in each issue. That's how the Top 5 Products list is determined — you pick it! The following products garnered the most reader responses in 2007.

These are the products your competition wants to know more about. Here's your chance to discover what they're after and to get more information for yourself.

DCI Products • Circle 20

Flo-Free Leaf Guard got the attention of readers in the Winter and Spring issues. Flo-Free Leaf Guard

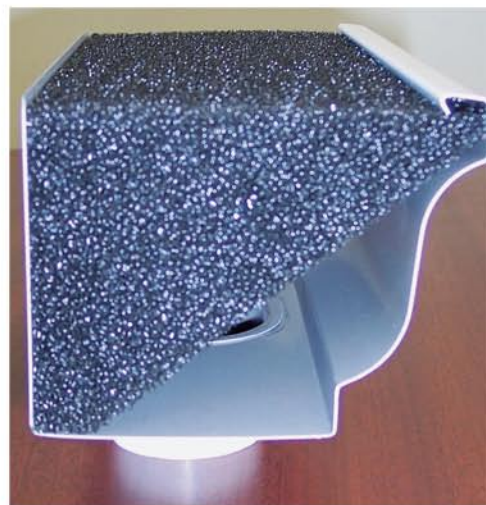

protects the natural flow of rainwater through your gutter system. It fits neatly inside any gutter system or can be installed in new seamless gutters. It eliminates clogged gutters and downspouts for good. Unlike the other gutter protection products, Flo-Free Leaf Guards stands behind its claims with a Lifetime Warranty. Made of 3/4-inch thick industrial strength nylon, Flo-Free comes in 5K, 6K, half-round, and custom sizes to prevent the blockage of water flow. Flo-Free does not interfere with roofing material and allows for the flow of water from any roof pitch. The product is not visible from the ground and prevents ice dams.

Gutter Topper • Circle 21

In the Spring issue, the Gutter Topper was a popular item. It installs over existing gutters and eliminates leaves and debris from clogging the gutter. It is certified to resist winds of 110 mph and withstand torrential rains. The company says it handles ice easily with the unique Ice Release system. Gutter Topper enhances your home's curb appeal and works with

all types of roofs. With Gutter Topper, water flows into gutters while leaves and debris stay out. Even in heavy downpours, there's never a worry about overflowing gutters. Gutter Topper has been tested to withstand 22 inches of rainfall per hour.

American Gutter Filter Circle 22

The company's customized no-clog filtering membrane formulation has a UV stabilizer, permanent fungicidal additives, which includes a fire retardant classification (FMVSS-302) and a pores per inch product attribute. Readers of the Winter 2007 issue wanted to know more about GutterFill, an insurance product with safety classifications. AGF's product line includes standard 5- and 6-inch K-style, 5- and 6-inch half-round, and fascia style GutterFill products. Custom design is available. AGF offers contractor product support, advertising material, web materials and a nationwide referral network program.
